These words agree in the general idea expressed by *overcome*, — that of bringing under one's power by the exertion of force *Conquer* is wider and more general than *vanquish*, denoting usually a succession of conflicts. *Vanquish* is more individual, and refers usually to a single conflict Thus, Alexander *conquered* Asia in a succession of battles, and *vanquished* Darius in one decisive engagement *Subdue* implies a more gradual and continual pressure, but a surer and more final subjection. We speak of a nation as *subdued* when its spirit is at last broken, so that no further resistance is offered. *Subjugate* is to bring completely under the yoke of bondage. The ancient Gauls were never finally *subdued* by the Romans until they were completely *subjugated.* These words, when used figuratively, have correspondent meanings. We *conquer* our prejudices or aversions by a succession of conflicts, but we sometimes *vanquish* our reluctance to duty by one decided effort; we endeavor to *subdue* our evil propensities by watchful and persevering exertions. *Subjugate* is more commonly taken in its primary meaning, and when used figuratively has generally a bad sense, as, his reason was completely *subjugated* to the sway of his passions.

Con'so-nant, *n.* [L. *consonans*, *-antis.*] An articulate sound which in utterance is usually combined and sounded with an open sound called a vowel, a member of the spoken alphabet other than a vowel; also, a letter or character representing such a sound.

Consonants are divided into various classes, as mutes, spirants, sibilants, nasals, semivowels, etc. All of them are sounds uttered through a closer position of the organs than that of a vowel proper, although the most open of them, as the semivowels and nasals, are capable of being used as if vowels, and forming syllables with other closer consonants, as in the English *feeble* (*-b'l*), *taken* (*-k'n*) All the consonants excepting the mutes may be indefinitely prolonged in utterance without the help of a vowel, and even the mutes may be produced with an aspirate instead of a vocal explosion. Vowels and consonants may be regarded as the two poles in the scale of sounds produced by gradual approximation of the organs of speech from the most open to the closest positions, the vowel being more open, the consonant closer, but there is a territory between them where the sounds produced partake of the qualities of both.

☞ "A *consonant* is the result of audible friction, squeezing, or stopping of the breath in some part of the mouth (or occasionally of the throat) The main distinction between vowels and consonants is, that while in the former the mouth configuration merely modifies the vocalized breath, which is therefore an essential element of the vowels, in consonants the narrowing or stopping of the oral passage is the foundation of the sound, and the state of the glottis is something secondary." *H Sweet.*

Neither of the words is necessarily used in a bad sense, since there may be a generous *strife* or *contention* between two friends as to which shall incur danger or submit to sacrifices Ordinarily, however, these words denote a struggle arising from bad passions. In that case, *strife* usually springs from a quarrelsome temper, and *contention* from a selfish spirit which seeks its own aggrandizement, or is fearful lest others should obtain too much. *Strife* has more reference to the manner than to the object of a struggle, while *contention* takes more account of the end to be gained.

Syn. — Conflict, combat, battle, encounter, shock, struggle; dispute, altercation, debate; controversy, difference; disagreement, strife. — CONTEST, CONFLICT, COMBAT, ENCOUNTER. *Contest* is the broadest term, and had originally no reference to actual fighting. It was, on the contrary, a legal term signifying to *call witnesses,* and hence came to denote first a struggle in argument, and then a struggle for some common object between opposing parties, usually one of considerable duration, and implying successive stages or acts. *Conflict* denotes literally a close personal engagement, in which sense it is applied to actual fighting. It is, however, more commonly used in a figurative sense to denote strenuous or direct opposition; as, a mental *conflict, conflicting* interests or passions, a *conflict* of laws. An *encounter* is a direct meeting face to face. Usually it is a hostile meeting, and is then very nearly coincident with *conflict,* as, an *encounter* of opposing hosts. Sometimes it is used in a looser sense; as, "this keen *encounter* of our wits" *Shak. Combat* is commonly applied to actual fighting, but may be used figuratively in reference to a strife of words or a struggle of feeling.

Hence, when figuratively used, it denotes an utter vitiation of principle or feeling. *Depravity* applies only to the mind and heart: we can speak of a *depraved* taste, or a *corrupt* taste; in the first we introduce the notion that there has been the influence of bad training to pervert, in the second, that there is a want of true principle to decide. The other two words have a wider use: we can speak of the *depravation* or the *corruption* of taste and public sentiment. *Depravity* is more or less open; *corruption* is more or less disguised in its operations. What is *depraved* requires to be reformed; what is *corrupt* requires to be purified.
